PART 2. INFORMATION ON BUSINESS OPERATION PERFORMANCE

A. BUSINESS OPERATION PERFORMANCE INCLUDING BUSINESS SEGMENT INFORMATION

CAMGSM began 2025 with strong execution across its national infrastructure and technology roadmap. In alignment with its vision to deliver robust, future-ready connectivity, the company launched multiple high-impact initiatives focused on expanding coverage, enhancing network quality, and reinforcing service resilience.

1. Aggressive Network Expansion Strategy Underway

To support rising data and voice demands across Cambodia, CAMGSM initiated a multi-phase national network rollout at the start of 2025:

• Nationwide Network Expansion

As part of its coverage expansion plan, CAMGSM has committed to building new mobile sites nationwide. By the end of the first quarter, close to 100 sites have been completed and brought online, extending coverage to both urban and underserved rural areas across Battambang, Kampong Cham, Kampot, Kandal, Phnom Penh, Takeo, Svay Rieng, Preah Sihanouk, Banteay Meanchey, Siem Reap, Kampong Thom, and Preah Vihear.

• Site Capacity Upgrades

To accommodate increased traffic and improve performance, a hundred of existing sites across Phnom Penh, Kandal, Kampong Speu, Tboung Khmum, Kampong Cham, Kampong Chhnang, Pursat, and Battambang have been upgraded. This is part of a broader initiative to upgrade 1000 sites nationwide throughout the year.

• Fiber Network Infrastructure Rollout

In parallel, CAMGSM has launched a nationwide initiative to deploy over 1000 kilometers of new fiber optic infrastructure. This will strengthen mobile backhaul, enhance enterprise connectivity, and future-proof the network for higher-capacity services.

Northern Backbone Transport Network Upgrade

The company has begun upgrading its backbone transport network in northern Cambodia, expanding transmission capacity from 140 Gbps to 190 Gbps. This upgrade improves data reliability and supports long-term scalability in line with regional growth.

2. Official Launch of Voice over Wi-Fi (VoWiFi)

CAMGSM officially launched its Voice over Wi-Fi (VoWiFi) service in early 2025. This advanced telecommunications feature is designed to elevate the mobile service experience by enabling high-quality voice calls over Wi-Fi networks, particularly in indoor environments and locations with limited cellular signal strength.

Key Benefits of VoWiFi:

- Enhanced Indoor Coverage: VoWiFi allows customers to make and receive voice calls using Wi-Fi, ensuring clear and reliable communication even in signal-challenged indoor areas.
- Seamless Mobility: The service supports automatic and seamless handovers between Wi-Fi and 4G mobile networks, maintaining ongoing calls without disruption when moving between coverage zones.
- Global Accessibility: Customers traveling or living abroad can enjoy VoWiFi services in any location with Wi-Fi access, bypassing the need for roaming and enabling them to stay connected with their local number at no extra cost.

3. Improved Network Availability through Power Resilience

As part of its commitment to reliability and sustainability, CAMGSM completed the replacement of old lead-acid battery systems with advanced lithium battery technology across 850 sites. This upgrade improves power efficiency, extends backup runtime, and significantly enhances network uptime during power disruptions.

CAMGSM remains firmly focused on executing its 2025 strategic network expansion plan with discipline and precision. With continued investments in mobile, fiber, and core infrastructure, the company is wellpositioned to deliver long-term value for subscribers and to build Cambodia's most reliable and futureproof mobile network.

CAMGSM is subject to income tax at the rate of 20% on taxable profits or the minimum tax at the rate of 1% of turnover in pursuance of the Law on Taxation. On 04th March 2024, CAMGSM received letter No. 9726 from General Department of Taxation (GDT) approving income tax incentives for 3 years from 2023 to 2025. This incentive follows the calculation method of income tax incentive decreasing proportion following to the table in the Annex to Sub-Decree No. 42, dated 24 February 2022. GDT also approved the temporary suspension of the monthly prepayment income tax for the same period as income tax incentive.

In Q1 2025, CAMGSM reported profit for the period of 3,034 million Riels decreased by 60,342 million Riels equivalent to 95% compared to Q1 2024. The decrease in profit for the period was due to the one-off other gains and reversal of provisions in Q1 2024 which impacted the operating profit.

In Q1 2025, CAMGSM reported the total comprehensive loss for the period of 683 million Riels, a decrease of 58,285 million Riels equivalent to 101% compared to Q1 2024. The decrease in total comprehensive income for the period was due to the one-off other gains and reversal of provisions in Q1 2024 which impacted the operating profit.

7. Factors and trends analysis affecting financial conditions and results

Financial performance is affected by a combination of new rules and regulations by regulators, competition, environmental, fiscal, and organizational factors. The revenue was also impacted by the international political and economic situation, and new rules and regulations on product offerings. Nevertheless, with a complete suite of connectivity services for both personal and corporate needs, CAMGSM continues to drive financial growth through mobile and digital lifestyle services and continuously enhances the network coverage and quality to better serve the customers.

B. SIGNIFICANT FACTORS AFFECTING PROFIT

1. DEMAND AND SUPPLY CONDITIONS ANALYSIS

The telecom industry in Cambodia maintained its growth momentum in Q1 2025, primarily driven by sustained increases in mobile internet usage. This growth correlates with rising smartphone penetration and ongoing adoption of digital services across both urban and rural segments.

On the demand side, connectivity remains a vital need for individuals and businesses alike, as they increasingly rely on mobile networks for communication, streaming, e-commerce, and digital financial transactions. From the supply perspective, competition among major telecom operators remains strong, pushing continuous improvements in service quality. Operators have maintained a high level of investment in network modernization and infrastructure. Key transformation initiatives are progressing as planned and highlighted by the completion of legacy 3G network shutdown and reallocation of spectrum resources to improve operational efficiency and customer management.

Despite network advancements, demand still outpaced supply in certain underserved or rural regions. These gaps present clear opportunities for network expansion and market growth. Moving forward, operators are expected to focus on maintaining a balance between affordability, network investment, and service quality to strengthen their competitive positioning and capture unmet demand in these high-potential areas.

2. FLUCTUATIONS IN PRICES OF RAW MATERIALS

There are no raw materials used for CAMGSM's products and service.

3. TAX ANALYSIS

CAMGSM has an obligation to pay taxes and excises to the government under the laws of Cambodia. CAMGSM is a large taxpayer and is required to pay tax under the real regime tax system as set forth by the General Department of Taxation. Tax expenses include taxes paid during the fiscal year and deferred taxes. Income Tax expenses are recorded in the statement of profit or loss.

4. EXCEPTIONAL AND EXTRAORDINARY ITEMS ANALYSIS

There are no exceptional items that impact this period's financial performance.

C. MATERIAL CHANGES IN SALES AND REVENUE

- Q1'25 Revenue Impact: overall gross revenue saw a drop compared with Q1'24 (-4%) and Q4'24 (-3%) resulting mainly from the termination of key non-telco services in compliance with the regulatory requirements. Despite the revenue contraction, the subscriber base grew, signaling potential opportunities for revenue recovery through strategic customer engagement.
- Evolving Usage Trends and Network Load: Consumer behavior continues to trend toward higher data consumption. Monthly Data subscribers continues to grow from Q4'24 (+1%) while usage grew by 6%.
- **FTTH:** has emerged as a key business priority. In Q1, we accelerated FTTH rollout in targeted areas, aligned with our commercial expansion roadmap.
- Devices: Having strengthened our strategic partnership with Samsung, with a launch of the new Samsung Galaxy S25 series, Cellcard has introduced an exclusive offer, reinforcing Cellcard's commitment to premium connectivity and high-quality device options. This has been a new revenue generating stream in Q1'25.

The foundational changes made since late 2024 are beginning to stabilize, and we are confident in our roadmap to margin recovery and revenue acceleration in the coming quarters.

D. IMPACT OF FOREIGN EXCHANGE, INTEREST RATES AND COMMODITY PRICES

The Company's sales revenue and purchases are mainly denominated and conducted in US\$. As such, Cellcard is not materially affected by the fluctuations of the foreign exchange rates.

The borrowings of the Company are generally on floating rate-based terms and hence, the Company would have to pay more interest with the increase in market rates.

E. IMPACT OF INFLATION

Inflation is the rate of increase in prices over a given period. Inflation is typically a broad measure, such as the overall increase in prices or the increase in the cost of living in a country. According to the National Bank of Cambodia's annual report on February 17, 2025, the inflation rate for the Kingdom is projected to remain moderate at 2.6% in 2025, reflecting an increase of 0.8% from the previous year. As our pricing structures and long-term contracts with suppliers provide a buffer against short-term cost fluctuations, the anticipated inflation rate is not expected to significantly impact our operations.

F. ECONOMIC/FISCAL/MONETARY POLICY OF THE ROYAL GOVERNMENT

The Royal Government of Cambodia's economic direction has been led by a series of national economic plans and socioeconomic goals with an aim to be on track to become an upper-middle-income country by 2030 and a high-income country by 2050 ((Pentagonal Strategy - Phase 1, August 2023). The Royal Government of Cambodia continues to prioritize economic stability, growth, and development through a

range of fiscal and monetary policies designed to enhance the country's competitiveness and financial resilience.

- **Economic diversification:** the government continued its efforts to diversify the economy beyond traditional sectors such as agriculture and garments manufacturing. Policies were directed towards promoting sectors such as tourism, manufacturing, construction, and services to reduce reliance on a few key industries and create more employment opportunities.
- **Investment promotion:** to attract foreign direct investment (FDI) and stimulate domestic investment, the government implemented policies to improve the business environment, streamlined regulatory processes, and provided incentives for investors. Special economic zones (SEZs) were further developed to facilitate investment and enhance export-oriented industries.
- **Infrastructure development:** the government prioritized infrastructure development projects, including road construction, port expansion, and energy sector investments. These initiatives aimed to improve connectivity, facilitate trade, and enhance the country's competitiveness on the regional and global stages.
- **Fiscal policy:** fiscal policy measures focused on maintaining macroeconomic stability, improving revenue collection, and managing public expenditure effectively. Efforts were made to broaden the tax base, enhance tax compliance, and strengthen public financial management systems to ensure fiscal sustainability.
- **Monetary policy:** the National Bank of Cambodia (NBC) continued to pursue a prudent monetary policy aimed at maintaining price stability and supporting sustainable economic growth. Measures included managing interest rates, controlling inflationary pressures, and supervising the banking sector to ensure financial stability.
- Social welfare programs: the government expanded social welfare programs to address poverty alleviation, improve healthcare, and enhance education access. Investments were made in social infrastructure, including healthcare facilities and schools, to improve the quality of life for citizens across the country.
- **Digital economy development:** policies were introduced to promote the development of the digital economy, including e-commerce, digital payments, and information technology services. Initiatives aimed to foster innovation, entrepreneurship, and digital inclusion to harness the potential of technology for economic growth and social development.

2. BASIS OF PREPARATION

This condensed consolidated interim financial information for the three-month reporting period ended 31 March 2025 has been prepared in accordance with Cambodian International Accounting Standard ("CIAS") 34, Interim financial reporting.

The condensed consolidated interim financial information does not include all the notes normally included in the annual audited consolidated financial statements. Accordingly, this report is to be read in conjunction with the annual audited consolidated financial statements for the year ended 31 December 2024, which have been prepared in accordance with Cambodian International Financial Reporting Standards ("CIFRSs").

The accounting policies adopted are consistent with those of the financial year and the corresponding interim reporting period.

New and amended standards adopted by the Group

An amended standard became applicable for the current reporting period as follows:

• Lack of Exchangeability – Amendments to CIAS 21

The amendment listed above does not have any impact on the amounts recognised in prior periods and is not expected to significantly affect the current or future periods.

Presentation in Khmer Riel

In compliance with the Law on Accounting and Auditing, the condensed consolidated interim financial information shall be presented in Khmer Riel (KHR). 14. EARNINGS PER SHARE

i) Basic earnings per share

Basic earnings per share are calculated by dividing the earnings attributable to equity holders of the Company by a number of ordinary shares in issue during the period as shown below:

| | Unaudited Three-month period ended | | | | |
|---|---------------------------------------|-------------|---------------|-------------|--|
| | | | | | |
| | 31 March 2025 | | 31 March 2024 | | |

| Basic earnings per share (US\$/Riel) (full amount) | 0.0004 | 2 | 0.01 | 32 | |

ii) Diluted earnings per share

Diluted earnings per share are calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Company had no dilutive potential ordinary shares as at the period end. As such, the diluted earnings per share were equivalent to the basic earnings per share.

15. FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

The estimated fair values of other financial instruments are based on the following methodologies and assumptions:

- i) Cash and cash equivalents The carrying values of these amounts approximate to fair values due to their short-term nature.
- ii) Accounts receivables and payables The carrying amounts less impairment provision approximate to fair value because these are subject to normal credit terms and are short-term in nature.
- iii) Loan to a related party The carrying amount approximates to fair value because of its short-term maturity.
- iv) Borrowings and other financial liabilities the fair values are not materially different from their carrying amounts since the interest payable on those borrowings is either close to current market rates or the borrowings are of a short-term nature.
- Other assets and other liabilities The carrying amounts of other financial assets and other financial liabilities are assumed to approximate to their fair values as these items are not materially sensitive to the shift in market interest rates.

16. SUBSEQUENT EVENT AFTER THE PERIOD
